- Speaker scores
Highest speaker score was 4.56 out of 5
Lowest speaker score was 3.3 out of 5
Average speaker score was 4 out of 5

- To what extent were your learning objectives met?

Legend: ■ Not met ■ Partially met ■ Mostly met ■ Completely met
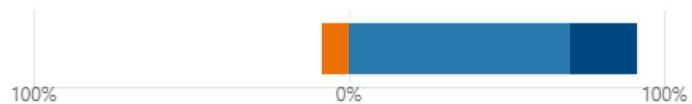

- How relevant did you find the event?

Legend: ■ Not relevant ■ Partially relevant ■ Mostly relevant ■ Extremely relevant

Next steps recommendations

From the feedback we can see delegates enjoyed the international focus of the conference. It is also clear that the discussion panels were best received, and it has been requested that the Academy undertakes more of these in the future. Therefore, it is proposed that we run at least one online Academy branded panel discussion webinar before the end of 2021. There are numerous topics that we could run this session on including, COVID-19, patient safety, burn out, Artificial intelligence and big data. For all the proposed and future sessions we would need to ensure inclusion of low and low-middle income countries not only as delegates but to make sure they are represented on the panel.
